

This policy has been largely adapted from the White Rose Maths Hub Calculation Policy with further material added. It is a working document and will be revised and amended as necessary.

FOUNDATION STAGE

Addition

Children are encouraged to develop a mental picture of the number system in their heads to use for calculation. They will develop ways of recording calculations (pictorial, using concrete aids, writing their own number sentences)

e.g. I have: 3 sweets, then I get one more:

When pupils are ready to record numerals they may begin to record the above example as: 3 1 or just as 4 but not yet as 3+1, and certainly not as 3+1=4.

Pupils will need lots of experience of practical addition, and an ability to respond to mathematical vocabulary practically. For instance, if you ask a child to show you 5 and 2 more, or 3 plus 1, or 1 add 4, they can use the teddies, counters or number tracks to do it, where counters can be placed in the circles without covering over the numerals.

They can also develop ways of recording calculations using pictures, etc.

[□]From this it will be possible to develop an understanding of the + sign, which will enable pupils to begin to record in the form 2+4.

Pupils then need to understand the concept of equality before using the = sign. This means they can see an example such as 7=6+1, or 5=5, as well as the more common arrangement 3+1=4, and know that it makes sense.

Bead strings or bead bars can also be used to illustrate addition:

8+2=10

Children will also learn about all four operations through rhyme and

Subtraction

As with addition, subtraction is initially recorded as drawing the result of a practical activity

Pupils will need lots of experience of practical subtraction, and an ability to respond to mathematical vocabulary practically.

For instance, if you ask a child to show you 4 subtract 1, or 4 minus 1, or take 1 from 4, they can use the teddies, counters or number tracks to do it

Initially number tracks will be used to subtract small numbers such as 5-2, where counters can be placed in the circles without covering over the numerals and then removed accordingly.

Bead strings or bead bars can be used to illustrate subtraction including bridging through ten by counting back 3 thencounting back 2.

Multiplication

Children will experience equal groups of objects.

They will count in 1s, 2s and 10s and begin to count in 5s.

²They will work on practical problem solving activities involving equal sets or groups.

They will work on practical problem solving activities involving doubling of numbers within 10

Division

In play and problem solving, children will be taught to group things equally and share items out,

They will count in 2s and 10s and later in 5s.

Children will work on practical problems solving activities involving hlaving of numbers within 10

Objective & Strategy	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part- whole model	Use part part whole model. Use cubes to add two numbers together as a group or in a bar.	3 yeart	4 + 3 = 7 5 3 $10 = 6 + 4$ Use the part-part whole diagram as shown above to move into the abstract.
Starting at the big- ger number and counting on	Start with the larger number on the bead string and then count on to the smaller num- ber 1 by 1 to find the answer.	12 + 5 = 17 10 11 12 13 14 15 16 17 18 19 20 Start at the larger number on the number line and count on in ones or in one jump to find the answer.	5 + 12 = 17 Place the larger number in your head and count on the smaller number to find your answer.
Regrouping to make 10. This is an essential skill for column addition later.	6+5=11 Start with the bigger number and use the smaller number to make 10. Use ten frames.	Use pictures or a number line. Regroup or partition the smaller number using the part part whole model to make 10. 9 + 5 = 14	7 + 4= 11 If I am at seven, how many more do I need to make 10. How many more do I add on now?
Represent & use number bonds and related subtraction facts within 20	2 more than 5.	Draw 2 more hats $5 + 2 =$	Emphasis should be on the language '1 more than 5 is equal to 6.' '2 more than 5 is 7.' '8 is 3 more than 5.'

Division as sharing	Image: height of the second	Children use pictures or shapes to share quanti- ties. 33 + 2 = 4 Children use bar modelling to show and support understanding. 12 12 $12 + 4 = 3$	12÷3=4
Division as grouping	Divide quantities into equal groups. Use cubes, counters, objects or place value counters to aid understanding. $\boxed{\begin{array}{c} \hline \\ \hline $	Use number lines for grouping $ \begin{array}{c} $	28 ÷ 7 = 4 Divide 28 into 7 groups. How many are in each group?

Objective &	Concrete	Pictorial	Abstract
Strategy			
Division as grouping	Use cubes, counters, objects or place value counters to aid understanding. 24 divided into groups of $6 = 4$ $96 \div 3 = 32$	Continue to use bar modelling to aid solving division problems. 20 20 \div 5 = ? 5 x ? = 20	How many groups of 6 in 24? 24 ÷ 6 = 4
Division with arrays	Link division to multiplication by creating an array and thinking about the number sentences that can be created. Eg $15 \div 3 = 5$ $5 \times 3 = 15$ $15 \div 5 = 3$ $3 \times 5 = 15$	Draw an array and use lines to split the array into groups to make multiplication and division sentences	Find the inverse of multiplication and division sentences by creating eight linking number sentences. $7 \times 4 = 28$ $4 \times 7 = 28$ $28 \div 7 = 4$ $28 \div 4 = 7$ $28 = 7 \times 4$ $28 = 4 \times 7$ $4 = 28 \div 7$ $7 = 28 \div 4$

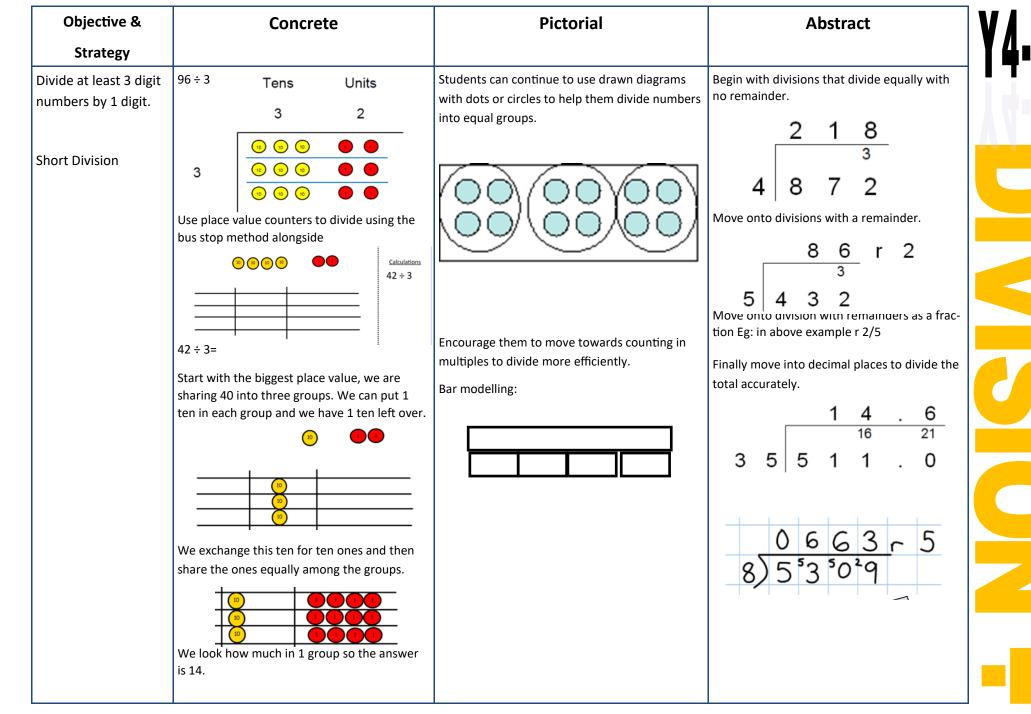

Long Division

Step 1—a remainder in the ones

^{h t o} 0 4 1 R1 4) <mark>1 6</mark> 5

4 does not go into 1 (hundred). So combine the 1 hundred with the 6 tens (160).

4 goes into 16 four times.

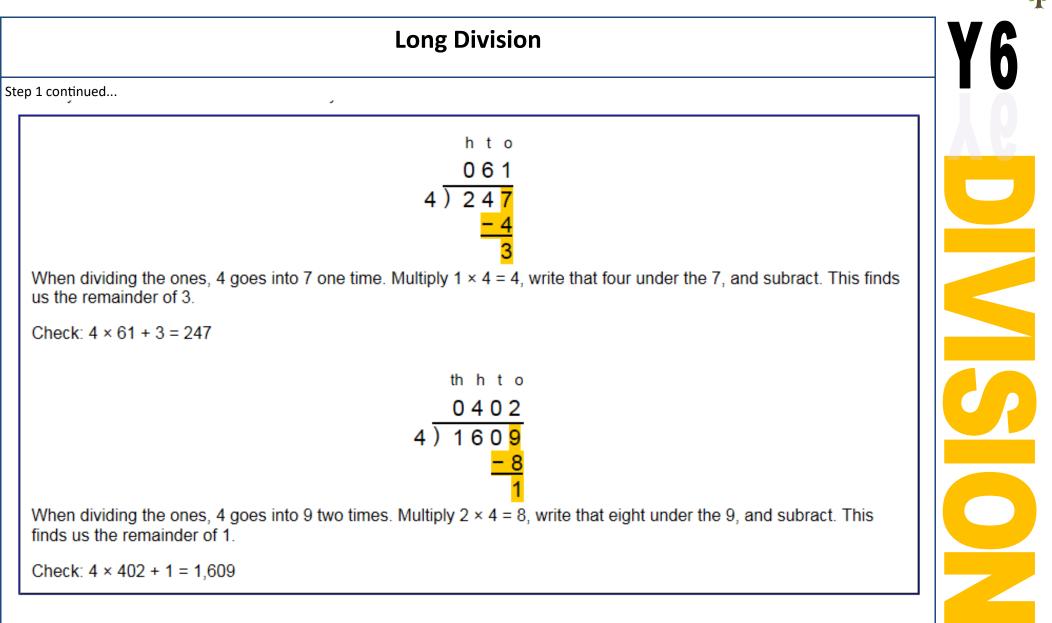

4 goes into 5 once, leaving a remainder of 1.

8 does not go into 3 of the thousands. So combine the 3 thousands with the 2 hundreds (3,200).

8 goes into 32 four times (3,200 ÷ 8 = 400) 8 goes into 0 zero times (tens). 8 goes into 7 zero times, and leaves a remainder of 7.

Long Division

Step 2—a remainder in the tens

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
t o <mark>2</mark> 2) <mark>5</mark> 8	t o 2 2) <u>5</u> 8 -4 1	t ∘ 2 9 2) 5 8 <u>- 4 ↓</u> 1 8
Two goes into 5 two times, or 5 tens ÷ 2 = 2 whole tens but there is a remainder!	To find it, multiply $2 \times 2 = 4$, write that 4 under the five, and subtract to find the remainder of 1 ten.	Next, drop down the 8 of the ones next to the leftover 1 ten. You combine the remainder ten with 8 ones, and get 18.

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
t o 2 <mark>9</mark> 2) 5 8 -4 1 8	t o 29 2)58 <u>-4</u> 18 <u>-18</u> 0	t o <mark>29</mark> 2)58 <u>-4</u> 18 <u>-18</u> 0
Divide 2 into 18. Place 9 into the quotient.	Multiply 9 × 2 = 18, write that 18 under the 18, and subtract.	The division is over since there are no more digits in the dividend. The quotient is 29.

Y6

	Long Divi	sion	
tep 2—a remainder in any of the place values	1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
	hto <mark>1</mark> 2)278	h t o 1 2) <mark>2</mark> 7 8 <u>- 2</u> 0	h t o 1 8 2) 2 <mark>7</mark> 8 <u>- 2</u> ↓ 0 <mark>7</mark>
	Two goes into 2 one time, or 2 hundreds ÷ 2 = 1 hundred.	Multiply 1 × 2 = 2, write that 2 under the two, and subtract to find the remainder of zero.	Next, drop down the 7 of the tens next to the zero.
	Divide.	Multiply & subtract.	Drop down the next digit.
	h t o 1 3 2) 2 7 8 -2 0 7 Divide 2 into 7. Place 3 into the quotient.	h t o $ \begin{array}{r} h t o \\ \frac{13}{278} \\ -2 \\ 07 \\ -6 \\ 1 \end{array} $ Multiply 3 × 2 = 6, write that 6 under the 7, and subtract to find the remainder of 1 ten.	h t o 13 2)278 -2 07 -6 18 Next, drop down the 8 of the ones next to the 1 leftover ten.
	1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
	h t o 1 3 <mark>9 2) 2 7 8 - 2 0 7 - 6 1 8</mark>	h t o <u>1 3 9</u> 2) 2 7 8 <u>- 2</u> 0 7 <u>- 6</u> <u>1 8</u> <u>- 18</u> 0	h t o 1 39 2) 2 7 8 -2 0 7 -6 1 8 -18 0
	Divide 2 into 18. Place 9 into the quotient.	Multiply 9 × 2 = 18, write that 18 under the 18, and subtract to find the remainder of zero.	There are no more digits to drop down. The quotient is 139.
